PROFESSIONAL SUMMARY

Full Stack and Backend Software Engineer with a Bachelor of Science in Software Engineering and enterprise experience developing backend microservices, RESTful APIs, full-stack web applications, and cloud-native deployments. Proficient in Node.js, Express.js, Python, FastAPI, React.js, TypeScript, PostgreSQL, MongoDB, Docker, Kubernetes, OpenShift, and CI/CD. IBM- and Meta-certified with practical experience in system design, test-driven development, database architecture, and accessible responsive interfaces.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend & APIs: Node.js, Express.js, Django, FastAPI, RESTful APIs, Microservices, JWT, System Design

Frontend: React.js, Redux, Responsive UI, Web Accessibility, Cross-Browser Optimization

Cloud & DevOps: Docker, Kubernetes, OpenShift, CI/CD, GitHub Actions, Jenkins, Git

Data & Quality: PostgreSQL, MongoDB, MySQL, TDD, Unit Testing, Integration Testing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer | 2025 - 2026

- Developed and scaled production backend microservices and RESTful APIs using Node.js, Express.js, and Python for enterprise customer workflows.
- Built responsive React.js dashboard components and integrated frontend interfaces with backend services and data pipelines.
- Containerized full-stack applications with Docker and supported Kubernetes and OpenShift orchestration across testing and production environments, contributing to 99.9% service availability.
- Created automated CI/CD pipelines and Git-based release workflows with GitHub Actions and Jenkins to improve deployment consistency and reduce production defects.
- Designed and optimized PostgreSQL and MongoDB database schemas in collaboration with solution architects, database administrators, and UI teams.
- Applied Agile/Scrum, test-driven development, unit testing, integration testing, code reviews, and object-oriented programming practices.

SELECTED PROJECTS

Sakinah — Quran Reader | Next.js · TypeScript · Capacitor · Mobile

- Built a cross-platform Quran reading and listening app with 9+ translations, verse-by-verse tafsir, 13 reciters, and multilingual reading controls.
 - Created a polished responsive interface and packaged the product for native mobile delivery with Capacitor.
- github.com/p1x1p/sakinah-quran-app

Enterprise API Gateway & Microservices Platform | Node.js · Express · Docker · JWT · CI/CD

- Architected a decoupled backend platform with JWT authentication, rate limiting, documented REST endpoints, automated testing, and deployment pipelines.
- Meta & IBM Capstone

Jawa Leek — Food Delivery Platform | React · TypeScript · Tailwind CSS · AI Chat

- Developed a full-stack product concept combining food discovery, delivery workflows, customer-kitchen communication, and AI-assisted support.
- github.com/p1x1p/online-sudanese-restaurant--jawa-leek-

EDUCATION

Bachelor of Science in Software Engineering | Mashreq University | Graduated June 2025

CERTIFICATIONS

- IBM DevOps and Software Engineering Professional Certificate — 2026
- Meta Backend Developer Professional Certificate — 2026
- Python Programming Certification — 2025
